ABOUT

I'm a Software Engineering Apprentice at Alt-School Africa passionate about web engineering, helping companies solve their complex problems in the simplest way possible, playing football and video games.

I love a great challenge but even more than that, I love to learn from it.

My skill set is diverse and includes various IT related competences rooting from my desire to be flexible and a valued asset wherever I am involved. Always staying updated with emerging trends and seeking to create solutions that last in the rapidly changing times.

SKILLS

- Communication.
- Adaptability.
- Creativity..
- Teamwork.
- Work ethic.
- Interpersonal skills.

EXPERIENCE

Alt-School Africa, Nigeria - *Trainee*

Software Engineer

January 2022 - Present

- After the first 3 months, I had a proper grasp of the fundamental concepts of computing: Computer Science, data structures, and algorithms that would shape up a foundation for my accelerated learning through the next 6 months.

- At six months, I was able to to do the following;
    - Develop pixel-perfect website layouts using HTML and CSS.
    - Build responsive web UIs with Flexbox and Grid
    - Build interactive websites using JavaScript.
    - Comfortably build a web app with either React.
    - Write clean code and document processes.
    - Work comfortably with other team members both locally and remotely via Git.
    - Deploy Frontend apps to several web hosting services like Netlify & Vercel, etc.
- To check out some of the projects I built, here is a link to my github https://github.com/wongiro.

LANGUAGES

Postgres, React, Express, Node:- Fullstack.

EDUCATION

Alt-School Africa, Nigeria - *Diploma*
JANUARY 2022 - PRESENT
Software Engineering.

Makerere University Business School, Kampala, Uganda - *Degree*
AUGUST 2017 - MAY 2022
Bachelor of Procurement & Supply Chain Management.
